Benchmark rubric v1 · 10 dimensions

01 EXECUTIVE SUMMARY

A strong foundation, with *room to lead* the way ministries meet people online.

World Changers Church International already presents one of the cleaner, more contemporary church websites in its peer group. This document is not a critique of that work — it is a *stewardship question*: given the reach God has entrusted to this house, is the digital front door doing everything it can to remove friction for the seeking visitor, the faithful giver, and the believer who lives on a phone?

We audited worldchangers.org against a ten-dimension rubric distilled from the best digital experiences in the American church — Life.Church, Elevation, Saddleback, NewSpring, Transformation Church, and the platforms they run on (Subsplash, Pushpay, Tithe.ly, Planning Center). The findings are encouraging and actionable: the site is solid and current, and the gaps that remain are the *same* gaps that separate a very good church site from a category-leading one.

8.5 / 10

Dimensions scored against the best-in-class rubric in this report.

6 Solid

Areas already performing at Basic-to-strong level — a real, current foundation.

4 Key Gaps

High-leverage gaps: native app, events off-site, giving friction, personalization.

"Blanketing the world with the Gospel of Jesus Christ to meet the needs of mankind." The digital experience is now one of the largest blankets a ministry holds — and it should be as seamless as the in-person welcome at the World Dome.

The headline. The most material gaps are not visual — the site already looks current. They are structural: there is **no branded mobile app** (the daily front door for the leading churches), the **events calendar lives on an external Dropbox link** rather than inside the site, giving is functional but lacks the modern one-tap conveniences (Apple/Google Pay, text-to-give), and the experience offers **little personalization** for a returning member versus a first-time guest. Each is fixable, and each compounds reach.

What we recommend. A phased path — quick wins that bring the calendar and giving conveniences in-house within weeks, followed by a strategic move to a unified app-and-web experience that meets members where they already are: on mobile, every day. The remainder of

this document states the current strengths fairly, scores each dimension transparently, and lays out that roadmap.

02 CURRENT STATE SNAPSHOT

What worldchangers.org *does well* today.

Credit where it is due. A fair audit of the live site shows a design that is clean, contemporary, and professional — generous white space, modern type, clear hierarchy. It is functional and current. The strengths below are real and should be preserved through any redesign.

Strengths confirmed in the audit

- **Clean, modern design.** White space, contemporary type, and a professional, on-brand feel throughout.
- **Clear primary navigation.** Our Church · Events · Connect · Media · Resources, with Visit Campus, Join, eChurch, Member Portal and Contact.
- **Prominent giving.** A header **GIVE** CTA to give.worldchangers.org, the **Grace Gang Partner** program, and a "How to Give" path.
- **Live & on-demand worship.** A "Watch Live" streaming section plus latest sermon titled with date and duration, and "Ways to watch."
- **Clear service rhythm.** Sundays 10 AM EST · Wednesdays 10 AM & 7 PM EST stated plainly.
- **Responsive & multi-channel.** A working mobile nav toggle, plus eChurch and Member Portal pathways.
- **Compelling events programming.** Health & Wellness Conference, Father & Son Car Show, Biblical Equality Roundtable — strong, featured content.

Observed friction points

- ◇ **Navigation duplicated.** Overlapping links across header and body create choice fatigue and dilute the primary path.
- ◇ **Limited section differentiation.** Sections look similar; the eye is not guided to the next most important action.
- ◇ **No mobile app.** The persistent, daily connection point used by leading churches is absent.
- ◇ **Calendar lives off-site.** The 2026 Event Calendar is a downloadable Dropbox link, not a native, browsable calendar.
- ◇ **Minimal personalization.** Every visitor sees the same page — no distinction between a first-time guest and a returning partner.
- ◇ **Outreach under-featured.** The mission to "meet the needs of mankind" is under-surfaced relative to its centrality.

WCCI is not starting from behind. It is starting from **solid and current** — which means the path to best-in-class is shorter than for most churches its size. The opportunity is to convert a good website into a living digital ministry platform.

03 THE GAP TABLE

Ten dimensions, scored honestly — *current vs. best-in-class.*

Each dimension is rated **Absent** (missing, or only an external link/PDF), **Basic** (present but generic), or **World-class** (matches the category leaders). A modern church site should target World-class on dimensions 1–6 and at least Basic on 7–10.

● World-class (2) ● Basic (1) ● Absent (0)

DIMENSION	WCCI NOW	BEST-IN-CLASS	GAP NOTE
1 • Giving UX	BASIC	WORLD	Prominent GIVE + Grace Gang Partner is good. Missing one-tap Apple/Google Pay, text-to-give , and clearly surfaced recurring giving inside a branded portal.
2 • Sermon / Media Library	BASIC	WORLD	Latest message + "ways to watch" present. Lacks a searchable, filterable archive (series/topic/speaker), follow-along notes, and recommendations.
3 • Plan-a-Visit / I'm New Funnel	BASIC	WORLD	"Visit Campus" exists, but there is no high-contrast "I'm New" guest funnel that captures details and chains into named next steps.
4 • Native Mobile App	ABSENT	WORLD	No branded app. Leaders use the app as the daily front door — watch, give, notes, prayer, check-in, notifications — all in one place.
5 • Events & Calendar	ABSENT	WORLD	The 2026 calendar is an external Dropbox download . Best-in-class is a native, browsable calendar with RSVP and add-to-calendar.
6 • Personalization	ABSENT	BASIC+	Every visitor sees one static page. No distinction between first-time guest, returning member, or partner — and no dynamic "next step for you."
7 • Livestream UX	BASIC	WORLD	"Watch Live" works. Opportunity to add an interactive online experience — live chat, prayer requests, give-in-stream, next-step prompts.

DIMENSION	WCCI NOW	BEST-IN-CLASS	GAP NOTE
8 • Speed & Modernity	BASIC+	WORLD	Design is contemporary and responsive. Refinement: tighten duplicated nav, sharpen section hierarchy, and confirm Core Web Vitals on mobile.
9 • Accessibility	BASIC	WORLD	Clean type and contrast help. Target a documented WCAG 2.1 AA pass — captions on sermons, alt text, keyboard nav, focus states.
10 • Multi-Campus	BASIC	WORLD	Five GA campuses + UK, South Africa, Australia, India. Opportunity for a campus/region picker that tailors times, locations, and content.

11/
20

Current composite. A genuinely solid score — well above the average church site. The four Absent/low dimensions (app, events, personalization, giving conveniences) are where the largest, fastest gains live. Closing them targets a **17–18 / 20** best-in-class range.

04 PRIORITIZED RECOMMENDATIONS

A phased path — *quick wins first*, then the strategic build.

Sequenced so the ministry sees value quickly and low-risk, then moves to the higher-leverage platform work. Nothing here disrupts the in-person rhythm at the World Dome — it extends it.

Phase I Quick Wins

WEEKS 1–4 · LOW EFFORT, HIGH TRUST

- 1 Bring the calendar in-house.** Replace the Dropbox download with a native, browsable events calendar — filter by campus/category, RSVP, and one-tap add-to-calendar.
- 2 Add modern giving conveniences.** Enable Apple Pay / Google Pay, text-to-give, and surface recurring giving prominently inside a WCCI-branded donation portal.
- 3 Add an "I'm New" funnel.** A single high-contrast guest path above service times that captures first-time-guest details and sets expectations.
- 4 De-duplicate navigation.** Consolidate overlapping links into one clear primary path and sharpen the visual hierarchy between sections.

Phase II Core Experience

MONTHS 2–4 · PLATFORM FOUNDATION

- 5 Searchable media library.** A true on-demand archive — filter by series, topic, speaker, date — with follow-along sermon notes and recommended next messages.
- 6 Interactive livestream.** Add live chat, in-stream prayer requests, give-in-stream, and next-step prompts to the Watch Live experience.
- 7 Accessibility pass.** Document a WCAG 2.1 AA conformance effort — captions, alt text, keyboard navigation, focus states, color contrast.

Phase III Strategic Build

MONTHS 4–8 · DAILY FRONT DOOR

- 8 Branded native mobile app.** One WCCI app: watch live + on-demand, give, sermon notes, prayer, events, and push notifications — the persistent daily connection point.
- 9 Personalized experience.** Tailor the page and app to first-time guest, returning member, or partner — surfacing the right next step for each.
- 10 Campus & region picker.** Let visitors choose among the five GA campuses and international offices (UK, South Africa, Australia, India) for tailored times and content.

11 Feature outreach. Give the "meet the needs of mankind" mission a dedicated, dynamic home for serve sign-ups and community impact.

05 THE OPPORTUNITY

. STEWARDING THE REACH

Every removed click is a *removed barrier* between a person and the Gospel.

Since 1986 — from eight people in a school cafeteria to the 8,500-seat World Dome, five Georgia campuses, and offices on four continents — WCCI has stewarded extraordinary reach. The digital experience is now the *widest blanket the ministry holds*. This work is about making that blanket as seamless as the welcome inside the Dome.

Steward the reach

Meet ~500 staff and a global congregation where they already are — on mobile, every day — through one branded app and a unified web home.

Remove friction

Make giving one tap and the first visit effortless. Fewer barriers to generosity and to walking through the door for the first time.

Honor the brand

Preserve the clean, current design WCCI has already earned — and elevate it to the category-leading tier its mission deserves.

See it, don't just read it — *a proposed solution site is ready.*

We've built a working demonstration that shows these recommendations applied to WCCI's own brand: native calendar, modern giving, an "I'm New" funnel, and a mobile-first experience. We'd welcome thirty minutes to walk you through it.

NEXT STEP

View the Proposed Site →

"Let your light so shine before men, that they may see your good works..." — and let nothing in the way of a click stand between them and it.

Prepared by Self Exec (xldr.org) for World Changers Church International, May 2026. This is an independent, good-faith assessment based on a public audit of worldchangers.org and a benchmark rubric distilled from leading church digital experiences (Life.Church, Elevation, Saddleback, NewSpring, Transformation Church) and their platforms (Subsplash, Pushpay, Tithe.ly, Planning Center). Self Exec is not affiliated with or endorsed by WCCI or any platform named. All WCCI facts cited are drawn from public sources. Scores are directional assessments intended to guide discussion, not a certified audit. WCCI names, marks, and content remain the property of World Changers Church International.
